

Paths

A highly draining, cost effective and comfortable surface, for a more enjoyable walking experience

playtop®
SAFER SURFACING

Performance Characteristics

Playtop Paths is a practical and highly water permeable surface and a cost-effective one-layer solution for areas where large machines do not easily access.

An environmentally friendly certified system which intelligently converts recycled rubber and natural aggregate into a resilient and slip resistant surface for all, from pedestrians and wheel chair users to bicycle riders and runners.

Meeting requirements for Sustainable Urban Drainage Systems if a substructure is required, this can be either stone, concrete or tarmac.

Features and Benefits

- Fully tested
- Environmentally friendly
- Low maintenance
- UV resistance
- Durable
- Water permeable
- Anti-frost
- Easy and quick to install
- One layer system
- High speed drainage
- Safe
